Release Overview

The Telescope Standard and Executive 2020.6 release contains enhancements which address issues as reported by customers following the last release of the product, version 2020.5, published in June, 2020.

RELEASE VERSION	Telescope Standard and Executive 2020.6
RELEASE DATE	October, 2020
RELEASE TYPE	Generally Available
DELIVERABLES	Product Release Software and Release Documentation

Release Strategy

As we build a great new foundation for Northplains, every release will focus on theme-based features and enhancements prioritized within the roadmap. The Northplains product management team bundles tasks into releases thematically so that it's clear how each release will impact your use of Telescope.

Available now, Telescope Standard and Executive 2020.6 release focuses on Conversion, Indexing and Search.

Highlights include:

- InDesign (INDD) conversions processing as expected
- Enhanced stabilization of Queue Broker connection pool
- Improved Search Facets display
- General quality and performance enhancements

Have a great idea? We'd love to hear it! We believe the best product ideas come directly from our users. [Click here](#) to submit your feature request directly to our product team!

Summary of Fixed Issues

Fixes for the following reported issues have been included in this release.

ISSUE ID	SUMMARY
NORTH-14958	Fixed an issue where the Indexing Broker would fail if a Child Indexing Broker would disconnect or stop
NORTH-17720	Fixed an issue where Search Facet disappears when opening preferences in collections
NORTH-18601	Fixed an issue where the licgen.exe license tool would make certain fields unavailable
NORTH-18752	Fixed an issue where INDD conversions would not work
NORTH-19792	Fixed an issue with the Video Manager interface where the Key Frames section would not be visible
NORTH-21928	Fixed an issue where the connection pool for the Queue Broker would only be accessible after restarting
