Release Overview

The Telescope Standard 2020.5 release contains enhancements which address issues as reported by customers following the last release of the product, version 2020.4, published in May, 2020.

RELEASE VERSION	Telescope Standard 2020.5
RELEASE DATE	June, 2020
RELEASE TYPE	Generally Available
DELIVERABLES	Product Release Software and Release Documentation

Release Strategy

As we build a great new foundation for Northplains, every release will focus on theme-based features and enhancements prioritized within the roadmap. The Northplains product management team bundles tasks into releases thematically so that it's clear how each release will impact your use of Telescope.

Available now, Northplains' Telescope Standard Release 2020.5 focuses on Search, Sharing and Versioning.

Highlights include:

- Improved Faceted Search display
- General quality and performance enhancements

Have a great idea? We'd love to hear it! We believe the best product ideas come directly from our users. [Click here](#) to submit your feature request directly to our product team!

What's New in this Release

UI Enhancements

This release introduces many touch-ups to UI elements throughout the product. These include adding more detail to the facet search UI.

Summary of Fixed Issues

Fixes for the following reported issues have been included in this release.

ISSUE ID	SUMMARY
NORTHHP-16204	Fixed the "not specified" fields in facet search
NORTHHP-16601	Fixed an issue where message numbers would be inconsistent
NORTHHP-17068	Fixed an issue where XMP information would not be retained
NORTHHP-17624	Fixed an issue where the refine search pane would not reflect deleted assets
